

KEYSTONE™

Modular Furniture System

PLN GROUP

**Silver.**

**Best Design Awards  
Winner 2017**

**PLN GROUP**

# We've been cooking up something special...

In today's rapidly changing workplace what works as an office layout today may not work tomorrow.

As an investment, office furniture should be flexible, agile and consider the future.

# Enter KEYSTONE™

A new, modular furniture system.

Building on a previous successful series of acoustic pods, Keystone™ is another step forward in modular furniture due to its innovative, reconfigurable design.

As its name suggests, Keystone™ offers you a central, foundational system which provides support for the entire office.

# Have your cake and eat it too.

## Change is a guaranteed part of the modern workplace.

Whether due to team growth, large-scale organisational restructure or changes to accommodate new styles of working, furniture should be flexible, agile and consider the future.

### A KIT OF PARTS

Keystone™'s unique modular design provides modern office users superior flexibility and agility. It offers users a "kit of parts" - an inventory of interchangeable components or "ingredients" which can be combined and reconfigured into various "recipes"- adapting to evolving needs with minimal investment.

Customise your furniture by choosing and assembling elements into unique combinations which work for your own staff and floor plan.

### À LA CARTE

Each piece can be bought, shipped and stored individually depending on the requirements of an office at a particular point in time.

*Modular: Interchangeable "ingredients" combine to form custom "recipes."*

## MULTI-FUNCTIONAL

Traditional office furniture can be limiting. A single item of furniture is used for a single purpose. With Keystone™, however, a focus pod can be reconfigured to be a sofa or a collaborative setting offering a unique, multi-functional user experience.

FOCUS POD

MEETING SPACE

*Reconfigurable: Add and remove parts to create different solutions according to user requirements.*

## FUTURE-PROOF

Due to its inherent modular design, Keystone is scalable, allowing users the ability to future proof offices without setting the arrangements in stone. This offers users the ability to scale up and down with shifts in staff or changes to office space or location.

*Scalable: Add and remove parts to create different solutions according to user requirements*

# Hungry for change.

## Supporting the latest ways of working.

In our quest to improve productivity and well-being within the modern workplace, we seek to integrate new technologies into our furniture designs, improve efficiencies and support the latest ways of working.

### COLLABORATION VS FOCUS

Furniture solutions should enable workers to be more productive within their working environment - which means striking a balance between promoting collaboration and allowing essential quiet spaces.

Keystone allows for a variety of layouts to be assembled from the same ingredients - covering all the bases.

Focus pods create areas to be used by staff who want quiet spaces. Collaborative meeting spaces with soft seating allows for spontaneous catchups in ways that do not disrupt those involved in concentrated work. Connected pods in rows creates alternative desk space for more mobile users or temporary team members.

The system has been detailed to allow for the full integration of power/data, cable management and technology, ensuring seamless user experiences and supporting workplace productivity and flexibility.

COLLABORATION

FOCUS

*Balance of focus vs collaborative space*

Individual Task

# This really takes the cake

**A quiet spot to work is now one of the most sought-after features in an open plan office.**

Stress, fatigue and loss of cognitive ability due to noise and distraction is on the rise. Investing in high-quality, soft furnishings helps mitigate the impact of noise and collaborative efforts.

## NOISE AND ACOUSTICS

Our soft furniture has been specifically designed using thousands of layers of Phoenix™ nanofibre in a proprietary composite. The microscopic fibres create an incredibly thin, dense web which drastically improves sound absorption levels across a broad range of frequencies.

This world-leading application of nanofibre (with proven noise reduction properties) results in superior, measurable acoustic performance and creates opportunities for new ways of working.

**CONVENTIONAL  
SOFT FURNISHINGS**

**KEYSTONE**

# Everything but the kitchen sink.

## Easy as pie.

Here's how it works. Keystone offers you a choice of "ingredients" which fit together to create "recipes". The shared wall system reduces the number of parts required and recipes are reconfigurable depending on your needs.

**ENTREE TASK** is a destination touch-down point which offers privacy for individual focused work. Suitable for mobile team members who need a spot to work but don't require a dedicated desk.

The soft, upholstered walls absorb noise common in today's open-plan office and provide shelter from both visual and acoustic distractions.

Can be placed as a stand-alone unit or combined with joining walls to create larger configurations.

The table can be swapped out for standing height table.

### FEATURES

 **Acoustics:** The inclusion of world-leading, exclusive nanofibre technology in the upholstery results in superior acoustic performance.

 **Power/Data:** Internally-routed cable management facilitates power and data solutions built into the work surface.
