About Inspired by a nautilus seashell, the kit-set Nautilus Lampshade rolls back into itself to mimic the complex organic form of the nautilus shell.

Made from beautiful copper, parts are nested tightly together when cutting to minimise material waste. The copper Nautilus comes flat-packed to minimise packaging materials and to reduce its size for transport.

Ideal for outdoor use, but note, the copper can dull or produce a natural verdigris over time – turning a beautiful greeny-blue colour. This can be prevented with a regular coating of mineral oil or wax. Alternatively, ask us if you'd like the 'recipe' to advance this verdigris process.

Note: Does not come with cord set or bulb. We can supply either standard or outdoor-rated sets on request.

Dimensions Small: 420H x 310W x 370L
Large: 500H x 360W x 445L

Gross Weight Small: 2.03kg
Large: 2.71kg

Volume Small: 0.048 CuMtr
Large: 0.08 CuMtr

Features Available as clean/bright copper

Supplied with supporting cables:
ideal for outdoor use.

Two sizes - small or large.

Made from sheet copper - 0.5mm

Designed and made in New Zealand.

*** NOTE:** The greenish versions in these images have been artificially aged to demonstrate how your Nautilus Copper light might look
