SHARE POD

Designed by IQ Commercial

SHARE POD

Designed by IQ Commercial

The Share Pod provides a semi-private collaborative meeting area in the open office. Comfortable seating and upholstered walls create a perfect spot for multi-media presentations or video-conferencing.

The free-standing unit can be placed anywhere in the office and can move to suit users who require flexibility in their floorplate.

Internally-routed cable management facilitates power and data solutions built into the work surface.

Better Acoustics. Fewer Distractions.

Developed in collaboration with award-winning firm, Revolution Fibres, the Share Pod's soft, upholstered walls incorporate exclusive nanofibre technology, which helps mitigate the impact of noise and collaborative efforts. This means both those inside and outside the pod can work more productively, free of distraction.

Quality Manufacturing for Peace of Mind

The Share Pod's robust construction means greater durability and long life of product. IQ Commercial's Pod range is also a proven low-VOC furniture option. It was tested using the standard ANSI/BIFMA M7.1 test method for determining emission levels for office furniture products and has passed - meaning the product was found to have no harmful off-gassing.

Dimensions	2,400L x 1,600D x 1,300H
Fabric Meterage	7.5m interior; 7.5m exterior; 8m seats
